

Technical Brochure

✓ Anti Foaming Agent

Anti-Foam

An anti-foam agent for adding to tank mixes with known potential for excessive foaming

Benefits

- ✓ Reduce excessive foaming causing problems during tank mixing and product application
- ✓ Excellent anti foam properties over a broad range of applications.

pH 6.5 – 7.5
SG 0.98 - 1.01

APPLICATION RATES

Tank mix	Add water to tank, then add Anti-Foam at 250-500ml per 1000L of water, prior to other products.
----------	---

NOTE: Add wetting agent or surfactant to tank mix last, after all other additions to minimize foaming.

PACKAGING
20L, 200L and 1000L
