Poly PK 10-22

A concentrated Phosphorus and Potassium liquid fertiliser, enhanced to extend supply of available P and K to all crop types.

Poly PK 10-22 offers a liquid replacement for solid fertilisers, ideal for injection and fertigation applications in all crop types. A unique polymer structure aids in the efficiency of applied P to the soil, while also having the ability to sequester trace elements for maximum soil fertility

Benefits

- ✓ Poly PK 10-22 offers a cost effective and easy to handle replacement for solid fertilisers
- ✓ As a neutral pH liquid, Poly PK 10-22 reduces soil-acidifying practices on your soils, while improving the availability of essential elements
- ✓ Liquid injection provides greater uniformity of nutrient application within the furrow for roots to grow into
- ✓ Perfect for fertigation applications. For fast uptake of P and K

Typical Analysis

	G/L	% W/V	% W/W
Phosphorous (P)	100	10.0	7.3
Potassium (K)	220	22.0	16.0
pH	7.4 – 8.2		
SG	1.30 -1.44		

Application Rate

Injection	Rate/Ha	Water/Ha	Fertigation/Pivot	Rate/Ha	Rate/Ha
Broadacre	3 - 60L	60 – 150L	Orchards, Vineyards, Pasture & Vegetables	10-80L/ha	Variable
Foliar	Rate/Ha	Water/Ha			
All crops	2- 20L	70-1000L			

Important:

- Do not foliar spray any crop during flowering
- Talk to your Hi-Tech Ag Solutions Agronomist or Agent about tank Mix options.

Packaging: 20L, 200L.1000L and Bulk
