

## SprayCharge

A spray adjuvant for the improvement and efficiency of knockdown glyphosate herbicides.

### Benefits

- ✓ New and Improved formula
- ✓ Excellent leaf coverage
- ✓ Reduces water hardness
- ✓ Chelation enhances speed and penetration through the leaf
- ✓ Adjusts pH of spray mix to ideal glyphosate application range
- ✓ Increases efficiency of Glyphosate herbicides
- ✓ APVMA approved

### Typical Analysis

	G/L	% W/V	% W/W
Nitrogen (N)	74	7.4	6.4
Sulphur (S)	90	9.0	7.7
Organic Carbon	3.5	0.35	0.3
pH	2.4 – 2.7		
SG	1.10 – 1.22		

### Application Rates

Foliar	% Solution Rate	L/100L	Water (L/ha)
All Crops	0.5 - 1.0	0.5 – 1.0	70+

Ensure all mixing and application guidelines are followed to achieve best results.

**Packaging:** 20L, 200L and 1000L
