Super K 40

A concentrated liquid Potassium, built for soil application.

Super K 40 is specifically designed for liquid injection as a continuous stream. Plants supplied with good levels of potassium are better able to withstand stress, insect damage, frost, and many plant diseases. With a high pH, it will help reduce soil acidification and providing the plant with a better growing environment around the root zone.

Benefits

- ✓ Cost effective and powerful form of Potassium
- ✓ Potassium is required in nearly every aspect of plant growth
- ✓ A Chloride-free source of Potassium
- ✓ Potassium is effective in suppressing sodium in the soil profile
- ✓ Less leachable form of Potassium
- ✓ Increase pH

Typical Analysis

	G/L	% W/V	%W/W
Potassium (K)	400	40.0	26.3
pH	11.0 – 12.0		
S. G	1.41 – 1.55		

Application Rates

Fertigation	Rate/ha	Water/ha
Pasture	5 – 30L	Various
Furrow Inject	Rate/ha	Water/ha
Broadacre	3 – 10L	Various

Packaging : 20 L, 200L and 1000L

Version Created: 15th January 2025
